TKIL Industries Demonstrates Advanced Mineral & Aggregate Crushing Systems at EXCON 2025

Bengaluru, India – 9th December 2025: TKIL Industries Pvt. Ltd. is set to showcase its comprehensive portfolio of Mineral and Aggregate Crushing Systems (MACS) at EXCON 2025, South Asia's largest construction equipment and technology exhibition. Through this exhibition, the company will demonstrate its dedication to developing high-quality engineering products that enhance "Make in India" initiatives while providing exceptional performance and innovation. TKIL Industries is also leading the industry towards more sustainable operations in mining, material handling, steel, cement, and urban infrastructure sectors.

TKIL Industries will showcase its MACS portfolio, which includes a wide range of crushing machines like jaw crushers, cone crushers, vertical shaft impactors (VSI), roll sizers, hammer mills, and vibrating screeners. All are designed to deliver long-lasting performance, maximize energy efficiency, extend operational life, and incorporate the latest advancements in mineral and aggregate technology. Along with these machines, TKIL Industries will also display skid-mounted crushing units ranging in size between two and four stages that operate at rates of 150-300 TPH, plus semi-mobile plants operating between 150 and 250 TPH, which achieve the demand of large-scale infrastructure projects and mining operations.

Mr. Vivek Bhatia, the Managing Director and CEO, TKIL Industries, said, "*As India's infrastructure and mining sector is evolving along with increasing customers' demands in terms of reliability, energy efficiency, and performance, EXCON is a great opportunity for us to showcase our latest MACS product innovations. Our MACS line provides solutions that offer a combination of robust engineering and cutting-edge technology.*"

Mr. TV.S.S. Srinivas, Business Head – Mineral and Aggregate Crushing Systems (MACS), added, "*The MACS range on display reflects TKIL Industries' deep understanding of material behaviour, application needs, and lifecycle performance. We look forward to meaningful engagements with customers at EXCON 2025 to explore solutions that address operational challenges and support future growth.*"

The company's commitment to providing dependable high-performance crushing technology designed specifically for an evolving Indian industrial and infrastructure landscape will be demonstrated through its showcase. TKIL Industries' exhibit reflects its background as a leading manufacturer with extensive engineering knowledge, to meet the requirements of its customers in mining, aggregates, and construction with products that perform optimally under the Indian conditions.

About TKIL Industries Pvt. Ltd.

TKIL Industries Pvt. Ltd. (formerly thyssenkrupp Industries India Pvt. Ltd.) is a prominent name in the engineering sector, specialising in the design, manufacture, supply, construction, and maintenance of industrial plants and systems. Since its inception in 1947, TKIL Industries has been at the forefront of scaling up new technologies every decade and delivering cutting edge solutions in mining, cement, energy, boilers, sugar, cogen, green hydrogen, bio-chemicals, and battery and energy storage, contributing significantly to industrial growth in India and around the world, driven by its world-class manufacturing facilities and large workforce for engineering, project, construction & execution and life cycle service including operations and maintenance.
